

# **EnviroScience, Inc.**

**Providing efficient, cost-conscious, and time-sensitive solutions to environmental challenges since 1989.**

EnviroScience, Inc. is a team of over 100 expert biologists, commercial divers, environmental scientists, and environmental engineers headquartered in Ohio, with additional offices in Nashville, Tennessee; Richmond, Virginia; Morgantown, West Virginia; Asheville, North Carolina; and Akron, Ohio. Since 1989, EnviroScience has provided expert technical services to help our clients meet their environmental design and regulatory requirements. Our clients include federal, state, and municipal governments, ODOT and other DOTs, the railroad industry, utilities, mining, and manufacturing, engineering firms, and private individuals. EnviroScience is often considered a “niche” environmental consultant due to our ecological consulting focus and nationally-recognized ecological services and environmental compliance for freshwater mussels, bats, fisheries, aquatic surveys, and stream and wetland management. For example, EnviroScience has completed nationwide surveys of streams, rivers, coastal areas, and other aquatic resources under the five-year National Aquatic Resource Surveys (NARS) contract with USEPA.

Few firms in the country retain as many biologists, licensed engineers, divers, and scientists under one roof and the majority of our staff have over 10 years of experience in their fields. Because of our team’s diverse professional background, we are able to provide comprehensive in-house

services and an integrated approach to solving environmental challenges, saving clients time, reducing costs, and ensuring high-quality work products. We always put our clients' needs first, by only using resources that are absolutely necessary and completing projects on time and within or below budget. Because of this business model, we hold Master Service Agreements with a number of national transportation and utility companies.

## Our Services:

- [Aquatic Survey](#)
- [Commercial Diving](#)
- [Ecological Restoration](#)
- [Ecological Services](#)
- [Emergency Response](#)
- [Endangered Mussel Surveys](#)
- [Laboratory & Analysis](#)
- [Stormwater Management](#)
- [Environmental Compliance Services](#)
- [Threatened & Endangered Species](#)
- [Wetlands & Streams](#)

Our experts take all key aspects of freshwater aquatic environments into consideration. From meeting the challenges of environmental disasters, to measuring water toxicity with bioassay, to restoring streams to a functional and natural state, the team at EnviroScience are leaders in environmental services.
