

Ecological Restoration

Stream and Wetland Restoration and Mitigation Services

EnviroScience offers a range of restoration services for a wide variety of clients. Restoration of streams and wetlands is a rapidly growing discipline. Our biologists design natural functional restoration projects to address water quality issues, habitat enhancement, mitigation and permit requirements. We also have a long history of providing grant assistance to those seeking funding for projects. Our experience, combined with our professional relationship with state and federal authorities, ensures that projects are completed accurately, quickly and within budget. Additionally, we have offered design build services through our [RiverWorks partnership](#) since 2007.

Our services include, but are not limited to:

Streams

- Dam Removal/Restoration
- [Stream Restoration/Relocation](#)
- Stream Bank / Slope Stabilization
- Riparian Enhancement/Stabilization
- Morphological Assessment
- Erosion Monitoring & Assessment
- Hydraulic Modeling

- Watershed Stability Assessments

Wetlands

- Wetland Restoration/Enhancement
- Wetland Creation

- Hydrologic Budgets

Other Services

- Conceptual Restoration
- Wildlife Restoration
- Watershed Analysis
- Ecological Storm Water Management
- Mitigation Site Evaluation
- Mitigation Plan Development
- Prairie Restoration
- Invasive Species Control
- Shoreline Enhancement/Stabilization
