

Ecological Services

EnviroScience's Ecological Services Group is a large team of biologists experienced at providing biological surveys and services to support natural resource inventories, environmental impact assessments, and environmental permitting for public, industrial, and private clients.

Our biologists perform assessments of fish, benthic macroinvertebrates, freshwater mussels, birds, reptiles, amphibians, mammals, and vegetation. Other services include wetland delineations and mitigations and stream restoration projects.

EnviroScience is pre-qualified for Ecological Services by the Ohio Department of Transportation, the Tennessee Department of Transportation, the Pennsylvania Department of Transportation and the West Virginia Department of Highways.

We are also certified mussel surveyors by the United States Fish and Wildlife Service and accepted by the Pennsylvania Fish and Boat Commission for Threatened and Endangered Fish Inventories.

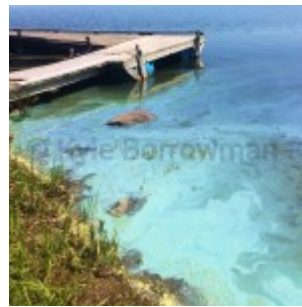

All of our projects are completed using creative problem solving and the latest in [GIS and CAD technology](#). Our professionalism and experience is a value to our employees, our clients, and the scientific community.

Our Ecological Services include:

- [Aquatic Survey](#)
 - [Fish](#)
 - [Benthic Macroinvertebrates](#)
 - [Habitat Assessment](#)
- [Threatened & Endangered Species Surveys](#)
 - [Endangered Bats](#)
 - [Endangered Mussels](#)

- 316(a) and 316(b) Evaluations
- Ecological Risk Assessment
- GIS Services
- Harmful Algal Bloom Testing
- Lake Management
- Preliminary Site Assessments
- Water Quality Monitoring
- Mammal Survey
- Bird Survey
- Reptile & Amphibian Survey
