

Environmental Compliance Services

Experts In Managing Regulatory NPDES Permits & Issues

Stormwater Runoff

Environmental issues faced by business leaders have moved beyond remediation and now require partnering with local, state, and federal environmental stakeholders on permits and planning. Enviroscience's Environmental Compliance Services group is focused on providing clients with cost-effective and efficient management of regulatory issues (e.g., permit applications, negotiation, management, guidance, etc.). This highly-seasoned group is well-versed in drafting, negotiating and executing the terms and conditions of regulatory permits, as well as unique situations such as opening a new site or closing and divesting an existing site. With over 90 years of combined experience in regulatory affairs, the Compliance

Services group can develop clients' environmental compliance strategy and plans, and work closely with clients on their tactical concerns when negotiating permits and requirements. The group is committed to developing an environmental compliance program with a client's operational needs.

Compliance Services:

NPDES Permitting – National Pollutant Discharge Elimination System

Industrial Process
Wastewater

- Individual, General, & Stormwater
- MS4
- Stormwater Construction
- Process Water Treatment Devices
- Commercial Wastewater Systems

Permit-To-Install (PTI)

- Holding Tanks
- Stormwater Treatment Systems
- Process Water Treatment Devices
- Commercial Wastewater Systems

Plans

- Stormwater Pollution Prevention Plans (SWPPPs)
- Spill Prevention Control & Countermeasure (SPCC)

- Hazardous Waste Contingency Plans
- Sludge Management Plans

Environmental Training

- Water and Stormwater
 - Spill Prevention Control & Countermeasure (SPCC)
 - Stormwater Pollution Prevention Plans (SWPPP)
- Waste (hazardous, universal, and used oil)
- Transportation
- Emergency Planning, Response, and Preparedness

Other Services

- Stormwater Best Management Practices (BMPs) Design/Installation
- Constructed Wetlands
- Oily Waste Treatment Systems
- Environmental Auditing
- Beneficial Reuse & Recycling
- Plant Closures – Cessation of Regulated Operations
- [PFAS Sampling and Analysis](#)
- Phase I

Stormwater Outfall from an Industrial Facility

Spill Prevention, Control, and Countermeasures (SPCC) Plans

In addition to many environmental permits, industrial facilities are required to possess and update their Spill Prevention, Control, and Countermeasures Plan (SPCC). The SPCC Program was created by the U.S. Environmental Protection Agency (USEPA) to help prevent oil discharges into Waters of the United States. The requirement for a SPCC Plan can be found in Title 40, Code of Federal Regulations, Part 112.3.

EnviroScience has written and revised SPCC Plans for facilities across the United States. Our experts carefully review the clients' requirements, evaluate the existing plan (or draft one if needed), and perform a detailed site inspection to verify and obtain any additional information. Then, EnviroScience develops a compliant plan which also contains inspection templates in a format that is easily understood and meets the SPCC requirements. In addition, we have also conducted SPCC Training in many locations around the country.

Stormwater Pollution Prevention Plan (SWPPP)

In compliance with their NPDES Permits, many industrial facilities are required by the USEPA and the State to develop a Stormwater Pollution Prevention Plan (SWPPP). The purpose of the SWPPP is to identify sources of pollution due to construction or industrial activities that could negatively affect stormwater discharges.

EnviroScience has provided SWPPP regulatory support and design services to facilities throughout country. Our experts represent clients during discussions with state and local

governments regarding the development of their SWPPP and any related issues that may arise. EnviroScience is experienced in designing bioretention cells/swales, infiltration trenches, rain gardens and stormwater detention/retention basins. In addition, we have also conducted SWPPP Training in many locations around the country. EnviroScience professionals have extensive experience with developing compliant plans with a client's operational needs in mind.

Need help with your project?

Our experts are here to discuss your needs and how we can help you move your project forward. Fill out the form below for more information on our services or to request a quote and we'll get back to you within 24 hours. If you need a response within an hour or less, please call us at 800-940-4025.
