

Industrial MSGP Assistance

INDUSTRIAL MULTI-SECTOR GENERAL PERMITS (MSGP)

If your industrial company is located in the United States, you are very likely subject to the USEPA MSGP. Our staff, formerly with Ohio EPA, are very familiar with regulations in the Northeast, Midwest, and elsewhere and can help you determine if certain regulations apply to your industry category. If you are subject to the regulations we can help you by recommending practices that can eliminate exposure in order to file a No Exposure Certification with EPA. This could be the least expensive route and exempts your company from the permit. If a No Exposure Certification is not possible, we provide all regulatory aspects of the permit including writing your Storm Water Pollution Prevention Plan, monitoring, evaluating the results, training your staff, and representing your interests with the EPA while complying with the permit. Should your company also have a direct discharge NPDES permit, our staff is capable of dealing with this permit as well.

Our MSGP assistance includes:

- **Determining your Corporate Regulatory Status**
- **Permit Requirement Training**
- **SWPPP Preparation**
- **MSGP Compliance Issues**

Need help with your project?

Our experts are here to discuss your needs and how we can help you move your project forward. Fill out the form below for more information on our services or to request a quote and we'll get back to you within 24 hours. If you need a response

within an hour or less, please call us at 800-940-4025.
