Geauga Park District

Key Services Provided

- Prairie Installation
- Ecological Assessment

Project Duration  
June 2007 – January 2008

ES Key Staff  
Michael Liptak  
Dave Czayka

## FROHRING MEADOWS PRAIRIE PLANTING

Bainbridge, Ohio

EnviroScience, Inc. completed seeding of 50 acres of tallgrass prairie, 48 acres of shortgrass prairie, and 7 acres of wetlands for the Geauga Park District at Frohring Meadows in Bainbridge Township, Ohio.

EnviroScience was contracted to select and install native species in a 7-acre wet meadow and 98 acres of prairie. Seed was installed using a Truax seed slinger mounted on an ATV and by hand in areas where the tractor and seed drill could not access without disturbing the soil. The remaining 84 acres were planted with prairie seed mixes using a tractor and a ten foot no-till seed drill. Seeding was completed in January 2008.

EnviroScience continues to monitor the progress of the prairie and wetland plantings and provides suggestions for any necessary management of weeds or other measures.
